

Data Sheet Sallegra® RS-485 USB Adapter

Sallegra® RS-485 USB Adapter

The Sallegra® RS 485 / USB adapter is used to connect the Satelco technician or service laptop to the Satelco/ Sallegra® access systems for offline or standalone configuration via the Sallegra® Configurator. By using an FTDI chipset, the device is compatible with all operating systems (e.g. OSX, Linux, Windows), in most cases it is also not necessary to install separate software drivers. The device has a terminal connection, so the Sallegra® technician can easily establish a connection to the Satelco® access systems.
