Battery module for UPS2 emergency power supply

- Set consisting of power supply unit, battery module, lead battery 4Ah
- Uninterruptible power supplies are designed for automation, access control and security systems where a continous supply must be guaranteed
- The battery used is a 12V – 4Ah (hermetic lead battery)
- A replaceable microfuse is also integrated in the battery module to protect the battery
- The maximum applicable capacity is 14Ah
- Furthermore, we recommend for the disposal of used rechargeable batteries, to observe the national ordinance

Technical specifications:	
Input voltage	230 VAC
Output voltage	12 VDC
Overload capacity	None
Current Ampere	500mA
Power	4Ah
Connection type	Screw connection
Function	DC – UPS
Signal contact	No
Dimmable	No
Mounting	Top-hat rail
Protection class	IP20
Function display	LED
Satelco Article no.	10655
Included items	Power supply unit, battery module, lead battery 4Ah
