Monitoring System VT325

The monitoring system VT325 room monitor offers cross-industry application possibilities. This compact measurement and alarm system is manufactured in the EU. The engineering and support of these monitoring systems are based in Germany.

Features:

- Independent operation, no installation of software required
- Multilingual web interface with integrated logic
- Fully SNMPv1, SNMPv2c and SNMPv3 (encrypted) Compatible
- Support of leading network management systems including Cacti, Nagios, PRTG
- MIB files and plugins for Nagios / Nagios Forks included in delivery
- SNMP Traps to NMS and SNMP Tools, SNMP Get Functions
- 2x Auto Sensoring Ports for any analogue sensors from Satelco
- 2x Dry Contact Ports for LAN connection of digital, potential-free contacts
- 2x 12V signal outputs for siren, alarm system or building surveillance
- Notification and alarm types such as email or SMS (via Email to SMS Gateway), encrypted email transmission (TLS/STARTTLS)
- Optional 1-Wire module for RFID card reader or for 1-Wire sensors
- Including 1x IP-capable temperature sensor (can optionally be set down to 100m)

Tecnical data:	
Product Dimensions	W 138 x H 33.1 x D 79mm
Packaging Weight	0.5Kg
Power Input	12V DC, 05A
Power Consumption	6 Watt
Operating Temperature	Temperature : Min. -10° C - Max.+80° C
Other	Chassis Grounding (M4 Thread) Recovery Switch Restart Button
Mounting-Possibilities	19''-Rack Mont Holes (Brackets Not Included) Desktop Wall Mount, Wall Turnable Mount (With Extension)
Max. Distance From the Unit	100 M
HS-Code	8471 50 000
Brackets (Accessories)	VT112 / Rotating mounting brackets (to be ordered separately)
Inputs Connection terminals	Two 12V 0.25A outputs (pitch 3.81mm, 3P)
Processor	ARM926-300 MHz / 64 MB / Linux 2.6.38
Network interface	1 wire (with extension) - Ethernet 10/100 Mbit/S
Built-in sensors	Sensor for the supply voltage (1%) Temperature sensor (accuracy 1%)
Status displays	Error LED LED indicator for power supply / network connection Two relay status LEDs
