Satelco Humidity sensor VT510

- **Measurement and monitoring of humidity in technical and server room infrastructures**
- **Measurement and monitoring of humidity in production environments**
- **Long-term measurement of relative humidity in warehouses, depots and archives**
- **Supervision and monitoring of air conditioning and ventilation systems**
- **Automation technology**
- **House and building technology**
- **Avoidance of mould formation (black mould etc.)**

Suitable for: all IP thermo-/hygrometers, monitoring systems and PDUs

Dimension	
	81 x 18 x 18 mm (L x W x H)
Weight	
	16 g
Power consumption	
	60 MW
Operating temperature	
	-40° C to +100° C
Measuring range	
	0% to 95% relative humidity (RH)
Mounting	
	Table / ceiling / wall mounting / mounting in IT racks
Extendable	
	Optionally removable up to 100 metres away
HS-Code	
	9025 11 800
Accuracy	
	+ / - 3% RH
Inputs	
	RJ11 6P4C Terminals
Satelco Article number	**11319**
